1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-39 are rejected under 35 U.S.C. 102(b) as being anticipated by Brett (US PAT. NO. 6,026,179).

Brett discloses a system and method for constructing at least one intermediate frame comprising identifying a plurality of points having related characteristics (e.g. col. 2 lines 3-15, object selected by user, the characteristics being color, attributes, etc.), determining if the points have changed position (e.g. motion or relative transformation), associating the points with at least a first pixel in the first and second frame, determining a relationship between a position of the first pixel and a position of the second pixel. See col. 2 lines 16-35, 49-60, col. 16 lines 9-33 for example.

3. Claims 1-39 are rejected under 35 U.S.C. 102(b) as being anticipated by Ries et al (US PAT. NO. 4,710,809 hereinafter Ries).

Ries discloses a system and method for constructing at least one intermediate frame comprising identifying a plurality of points having related characteristics, determining if the points have changed position (e.g. picture element positions), associating the points with at least a first pixel in the first and second frame, determining
